AI departments for your business, with you in charge.

MusTech OS puts AI departments on your own computer, set up for your business at AI Jumpstart. They keep your ledger, draft your replies, quotes, and chasers, and bring you a standup every morning. You approve on your dashboard; nothing leaves without you.

What it does for you

The same questions, day and night? Answers ready before they ask.

SALES AND CUSTOMER CARE

The three most-asked jobs in our research: listings with the right search words (8 mentions), answers to repeat questions (8), and missed calls and messages (6). Your AI drafts all three from your own records.

→ **Listings, repeat answers, and missed calls, drafted for you to send**

Receipts, quotes, chasers, and filing dates, kept in one place.

FINANCE AND COMPANY ADMIN

Receipts sorted (6 mentions), quotes in minutes (5), and which Singapore grants you may qualify for (4). Payment chasers are drafted when an invoice is late; filing dates sit in your calendar.

→ **The paperwork side of the business, kept up to date**

Need a website? It takes you there, one plain step at a time.

FOUNDER'S OFFICE (EVERY INSTALL)

Every install can do this. Your AI recommends a route (a builder you edit yourself, or a small site it builds), writes the pages from your workspace, and walks you through the domain and going live.

→ **From no website to a live site on your own domain**

Say it once. It is on the ledger, in your standup, and chased.

FOUNDER'S OFFICE

Say or type a promise, an order, or a worry from your phone or laptop. You get a numbered read-back to confirm, it goes on your ledger with no invented dates, and your morning standup brings only the calls that need you.

→ **One ledger of what you owe and what is owed to you**

Your morning standup

By email and on your dashboard, in your own brand colours:

RED	Invoice to Kopi Lab is 14 days late. A chaser is drafted: send it?
DECIDE	Quote for the Tan wedding order is ready. Approve and send?
INPUT	When is your last order date before the holiday?
DONE	3 receipts logged with GST; 2 missed-call replies drafted.

Why founders trust it

01 **Real work from your own records.** Not generic tips: quotes from your price list, chasers from your ledger, listings in your words. A missing fact is asked for, never made up.

02 **Nothing leaves without you.** Every message, payment, and publish waits for you. When your AI needs to go past a limit, it asks; you approve on your dashboard, and the gate closes by itself.

03 **Your business stays on your computer.** Your records never go to MusTech. It runs on the AI plan you already pay for, and nothing breaks if you stop paying us.
