From seat reservation to shipping with your AI departments.

PRE-CLASS SETUP	COMPUTER	AI SUBSCRIPTION	MOBILE COMPANION
~25 minutes total	**Mac (macOS 13+) or Windows 11**	**Claude, ChatGPT, or Google AI**	**iPhone or Android browser**

Three Phases · Nine Steps (Symmetrical Setup & Execution)

PHASE 01 — Enrol & Calibrate

~12 mins · Any device

1 Reserve your Jumpstart seat

Complete checkout via PayNow or card. Your receipt and 1-year signed update licence arrive immediately.

2 Complete the 10-minute calibration

Answer plain-English questions on your offers, clients, and workflow so we configure the right AI departments.

3 Receive your tailored workspace email

Your custom MusTech OS workspace is compiled from your answers and sent to your inbox with your install link.

Have ready: Your email address, PayNow or card, and a snapshot of your current offers and clients.

PHASE 02 — Install & Connect

~15 mins · Your Mac or PC

4 Run the signed MusTech OS installer

Download the notarised Mac or Windows package from your setup page and double-click to install with zero terminal setup.

5 Unpack & open your Command Centre

Click Set up my workspace on the install page. Your browser opens your local Command Centre; bookmark it for daily use.

6 Connect your AI engine & phone

Select the AI tool you already pay for on the Get Started card, then scan the QR code to pair your phone for quick capture.

Have ready: Your laptop, your macOS/Windows login password, and your paid AI subscription.

PHASE 03 — Build, Launch & Run

2 half-days + daily rhythm

7 Day 1: Calibrate your brand & live ledger

Load your brand colours, active retainers, unpaid invoices, and statutory deadlines into one live Commitments Ledger.

8 Day 2: Ship a live sprint with your AI

Work with your AI to create a website, scope social listening on market trends, or build a full product launch plan.

9 Daily 8 am Executive Briefing

Receive your morning dossier in your own company's brand colours, approve key calls in one line, and track weekly execution.

Have ready: Your laptop and charger, plus a real website, trend brief, or product launch you want to ship.

Your Daily & Weekly Operating Rhythm

8:00 am	**Review your company-branded briefing.** Approve pending client, pricing, or launch calls (`D-0019 yes`).
At your desk	**Co-build & execute with your AI.** Create pages, run social listening on trends, or check launch compliance.
On the move	**Capture notes & receipts from your phone.** Drop a voice note or receipt photo; your workspace files it and sends a read-back.

Quick Troubleshooting

"Set up" button did nothing: Run the downloaded installer first, then click Set up my workspace again.

Setup link expired (48h): Click Send a new link on the install page for a fresh 48-hour token.

Closed the Command Centre tab: Reopen your localhost bookmark at any time; the background service stays active.

Uninstalling or moving laptops: Open MusTech OS in Applications; your local company folder stays intact.
