MUSTECH OS · GUIDE

Your company, staffed.

MusTech OS puts AI departments on your own computer that do real company work: your website, your launch, your invoices, and your contracts. They work inside rules they cannot get round, and anything that matters waits for your yes.

RUNS ON	LIVES ON	INCLUDED	INSTALLED AT
Claude Code, Codex, or Antigravity	Your own Mac	1 year of updates	Jumpstart

---

01

Ask for the outcome. Get the finished work.

Say what you need in your own words, in your AI tool at your desk. The right department picks it up with your prices, your clients, and your rules already loaded.

BUILD YOUR WEBSITE

"I need a proper website for the studio."

WHAT COMES BACK

Website plan: halcyonstudio.sg

DOMAIN	halcyonstudio.sg via a local SGNIC registrar, about S$45 a year. Registered in your name, not ours.
HOSTING	Three options compared with costs in S$. Recommended: a free static host with a Singapore edge.
DESIGN	Three directions to pick from, your fonts and colours, every colour pair checked for contrast.

Tracked as a project with its own scope and sprint register

RUN A LAUNCH

"We launch the new retainer package on 1 December."

WHAT COMES BACK

Launch plan: Growth Retainer, 1 Dec

T-21 DAYS	Offer page, price confirmed from your price list, FAQ drafted.
T-14 DAYS	Email to 42 past clients, three posts scheduled, partner brief sent for your approval.
T-7 DAYS	Readiness check: links, payment page, and terms all tested.

Every date lands in your Commitments Ledger

GET PAID

"Who still owes me money?"

WHAT COMES BACK

Receivables: S$26,250 outstanding

KOPI LAB	S$12,400, 21 days late. Firm reminder drafted: second chase, statement attached.
ARDEN & CO	S$8,600, due Fri 14 Nov. Courtesy note drafted for Thursday.
HALCYON	S$5,250, due Mon 1 Dec. Nothing to send yet.

Reminders wait in Decide. You press send.

PRICE EXTRA WORK

"They now want a second landing page too."

WHAT COMES BACK

Variation notice: Halcyon Studio

SIGNED SCOPE	One landing page (SOW clause 2.1). The request is outside it.
COST	S$4,800 from your price list, plus 6 working days.
REPLY A	Yes, as a variation at S$4,800, new delivery Fri 28 Nov.

You choose the reply. Nothing is sent for you.

CHECK A CONTRACT

"Read this agreement before I sign."

WHAT COMES BACK

MSA_Halcyon_v3: 2 clauses to push back on

CLAUSE 9.2	Work in progress is unpaid if they end early. About S$9,600 at risk on this sprint.
ASK FOR	Work completed to the termination date is invoiced at agreed rates.
CLAUSE 14	They own all drafts, including rejected concepts. Ask to keep unused work.

Plain words, with the exact clause quoted

PREPARE A MEETING

"I meet Apex Holdings at 2 pm."

WHAT COMES BACK

Brief: Apex Holdings, 2 pm

LAST TIME	They asked for a cheaper option on 12 Oct. You promised a revised quote.
LIKELY PUSHBACK	Timeline. Your answer: two phases, first one live in four weeks.
YOUR PRICES	S$18,000 standard, S$14,500 for phase one only. No other discount is approved.

Built from your own notes and price list

STAY ON TOP OF FILINGS

"What do I need to file this year?"

WHAT COMES BACK

Statutory calendar: FY ending 31 Dec

IRAS	Estimated Chargeable Income due 31 Mar. Figures pack prepared for your accountant.
ACRA	Annual return due 7 months after year end. Checklist ready.
LICENCES	Business licence renewal in 30 days. On your calendar.

From official sources only. You file; it never files for you.

SHAPE YOUR BRAND

"Make our posts look and sound like us."

WHAT COMES BACK

Brand board and voice guide

LOOK	Your colours, fonts, and logo rules on one board, with contrast checked.
VOICE	How you sound, from your own past messages: three do's and three don'ts.
CONTENT	A month of posts planned, each one checked against the board before you see it.

Every department uses the same board

Names, amounts, and dates are examples.

02

Your company reports in before you do.

Overnight, the departments work through what came in. At 8 am your Command Centre shows only what needs you: decisions to make, facts only you know, and things to be aware of.

COMMAND CENTRE · 08:00 SGT	3 NEED YOU
DECIDE	Send the variation notice to Halcyon Studio: S$4,800, +6 days?
DECIDE	Second reminder to Kopi Lab for INV-0042, S$12,400, 21 days late?
INPUT	Was the Arden retainer renewed for Q1? Needed for the cash forecast.
NOTIFY	Website sprint 2 finished. Preview ready for your review.

03

Rules the AI cannot get round.

Four locks sit between the AI and your business. None of them is a request in a prompt: each is a check that runs before the AI acts.

01

The guard

Checks every action before it runs. The refusals are written in code, not in a prompt the AI can talk its way past.

20 REFUSALS IN CODE

02

Your yes

Sending, paying, publishing, and deleting wait for you as a decision. Silence is never a yes.

NOTHING ACTS UNANSWERED

03

The seal

Its rules and tools are fingerprinted. If one changes, every department stops, and that is the first line of your morning report.

PAUSES ON ANY CHANGE

04

The record

Every refusal and every decision you make is written down, in files on your computer that the AI cannot edit.

DECISION LOG

IF THE AI TRIES TO	IT IS STOPPED, AND INSTEAD
× **Put the new website live**	→ Prepares the exact step and asks you to press it.
× **Open the file that holds your passwords**	→ Tells you which one is missing by name, never its value.
× **Loosen its own rules**	→ Raises the change for you to decide, with the wording before and after.
× **Take your silence as a yes**	→ Holds, and asks again in tomorrow's report.
× **Send a customer's details off your computer**	→ Names what would leave and where it would go. You decide.

How we know they hold

Before a lock ships, a second AI model is set on the harness to get past it. Every way through it found is now a refusal with its own test:

Reached outside its own folder with a wildcard	CLOSED 20 OCT
Made a shortcut that led outside its folder	CLOSED 20 OCT
Wrote a protected file through a one-line script	CLOSED 3 NOV

Every lock is written down with the incident behind it, and the build fails if one is missing. Tested in real sessions in Antigravity, Claude Code, and Codex.

04

Yours, on your computer.

Your organisation	Departments chosen and sized from your questionnaire. A design studio and a trading company get different offices.
Command Centre	Your dashboard: what needs your decision, your ledger of commitments and money owed, and your numbers.
82 skills	Contracts, payments, launches, websites, filings, brand, and more, each with its own rules.
1 year of updates	New skills and fixes, signed by MusTech and checked on your computer before they install.

Your records are ordinary files on your own computer. MusTech never holds your business data.

05

Jumpstart installs it with you.

Two half-day sessions, in person. Day 1, your open work, money owed, quotes, and deadlines go into one ledger. Day 2, you answer your first morning report and put the departments to work.
