Your company, staffed.

AI departments on your own computer that do real company work: your website, your launch, your invoices, and your contracts. Anything that matters waits for your yes.

You ask. It comes back finished.

Build your website
"I need a proper website for the studio."
→ **Website plan: halcyonstudio.sg**

Run a launch
"We launch the new retainer package on 1 December."
→ **Launch plan: Growth Retainer, 1 Dec**

Get paid
"Who still owes me money?"
→ **Receivables: S$26,250 outstanding**

Price extra work
"They now want a second landing page too."
→ **Variation notice: Halcyon Studio**

Check a contract
"Read this agreement before I sign."
→ **MSA_Halcyon_v3: 2 clauses to push back on**

Prepare a meeting
"I meet Apex Holdings at 2 pm."
→ **Brief: Apex Holdings, 2 pm**

Stay on top of filings
"What do I need to file this year?"
→ **Statutory calendar: FY ending 31 Dec**

Shape your brand
"Make our posts look and sound like us."
→ **Brand board and voice guide**

Names and amounts are examples.

8 am, your Command Centre

DECIDE	Send the variation notice to Halcyon: S$4,800, +6 days?
DECIDE	Second reminder to Kopi Lab: S$12,400, 21 days late?
INPUT	Was the Arden retainer renewed for Q1?
NOTIFY	Website sprint 2 done. Preview ready.

Rules the AI cannot get round

01 **The guard.** Checks every action before it runs. The refusals are code, not a prompt the AI can talk its way past.

02 **Your yes.** Sending, paying, publishing, and deleting wait for your decision. Silence is never a yes.

03 **The seal.** Its rules and tools are fingerprinted. If one changes, every department stops and it tops your morning report.

04 **The record.** Every refusal and every decision is written down, in files on your computer the AI cannot edit.

Tested by attack

A second AI model attacks the harness before each release. Each way through became a refusal:

Reached outside its folder with a wildcard	**20 Oct**
Made a shortcut that led outside its folder	**20 Oct**
Wrote a protected file through a one-line script	**3 Nov**

82 skills, each with its own rules	**1 year** of updates, signed by MusTech	**None** of your business records held by MusTech	**2** half-days to install it with you

Runs on the AI tool you already pay for: Claude Code, Codex, or Antigravity. **Installed with you** at Jumpstart, two half-day sessions in person.
